

Strike WEF

The protest hike against the WEF.

On 13 and 14 January 2024, we will hike again to stand up for global justice.

Why are we doing this?

Every year, representatives of large corporations, politicians and scientists gather at the World Economic Forum (WEF) to discuss global issues. They claim to be saving the world. While the super-rich and corporations continue to increase their wealth, billions of people are suffering from poverty, inequality and the consequences of climate change.

We stand up for social justice, fight for a world where everyone has enough to live on and campaign for an economy that prioritises people's needs.

Plan of the approved hike:

- 13 January 2024: Start (opening weekend of the WEF): Küblis - Klosters
- 14 January: Klosters - Davos
- 14 January at 15:00: Juso rally on the Davos square

Catering and sleeping places are already organised.

Please register so that we can ensure that the infrastructure is sufficient. Registration (via our anonymous portal, see below).

Whether young or old, this fight concerns us all and we welcome everyone!

For ecological reasons, we have printed a limited number of flyers. We would be delighted if you could help us mobilise by taking a photo of this flyer and passing it on to your friends.
